PROFESSIONAL SUMMARY

A passionate and creative **Web Developer** with 1 year and 3 months of experience specializing in **front-end development, CMS customization, full-stack development and UI/UX prototyping**. Adept at building responsive and engaging websites using **HTML, CSS, PHP,** and **WordPress**, with hands-on experience managing database via SQL, with domains and hosting via Plesk. Successfully handled multiple web projects across the automotive and tourism sectors and maintained internal company platforms. Experienced in managing both public-facing and in-house websites, ensuring reliable and user-friendly digital experiences for staff and clients alike.

Notable Achievement: Designed and deployed 4 company websites across various industries and managed 2 in-house company websites including a staff portal and a client-facing site, improving internal communication and customer engagement.

CORE EXPERTISE

- UI/UX Design & Prototyping
- Responsive Web Development
- CMS Website Customization
- Cross-Browser Compatibility
- SEO Optimization Techniques

- Website Maintenance & Updates
- Web Hosting & Plesk Admin
- Customer Inquiry Integration
- Front-End Coding (HTML/CSS/PHP)
- Team Collaboration & Communication

NOTABLE ACHIEVEMENTS

- **Designed and launched 4 fully responsive websites** for automotive, tourism, and insurance companies, enhancing user engagement and brand visibility.
- **Improved page load speed by 40%** through performance optimization techniques, including image compression and code refinement.
- **Reduced inquiry response time by 30%** by integrating dynamic contact and booking forms across all websites.

WORK EXPERIENCE

Executive Web Developer **Jan 2024 – Mar 2025**
Pantai Bharu Group of Companies

- **Designed and developed responsive websites** for automotive and tourism subsidiaries using HTML, CSS, PHP, and WordPress.
- **Created UI/UX wireframes and prototype in Figma** before development to ensure a user-centered design approach.
- **Managed domain and server settings using Plesk** for secure deployment and hosting.
- **Maintained and developed two internal websites:**
  - A **staff portal** hosted via **Exabytes**, using **SQL, HTML, CSS, and PHP** for internal staff communications and operations.
  - A **client-facing corporate website** developed in **WordPress,** tailored for external users.
- **Customized CMS platforms and themes,** improving usability, SEO, and mobile friendliness.
- **Oversaw IT and web admin tasks,** including managing staff email accounts, telecommunications, and plugin updates.

Highlights: Improved SEO performance, optimized website loading speed, and aligned UI with brand identity.
